INF220, Autumn 2003: Exercise 10

This is a exercise large set, meant to give you some relevant exercises to choose from when you want to check your skills.

2. From the book: 6.3-1.

   Remember that $\equiv_X$ typically is a congruence relation defined from $X$, whether $X$ be a class of algebras or a homomorphism.

4. From the book: 7.3-2 (i).

5. From the book: 7.4-7.

6. From the book: 7.6-3.
